

# FREEDOM BUSINESS COMMUNITY

**JOIN US...**

Online directory for businesses, organisations and individuals who do not wish to discriminate on any grounds, including personal health choices.

Politics, power, censorship and greed are causing segregation in society and we are taking action to do something about it!

We needn't be interested in someone's personal health choices, the colour of their skin, their sexual preference, their gender or their medical records as this only causes division. We are all unique human beings who should be free to make decisions that suit our own personal circumstances. In turn, we should respect other people's decisions.
